

**Welcome to VOZ!**

Thank you for selecting VOZ as your communications provider.

## Getting Started

Your **Linksys PAP2** Analog Telephone Adapter Kit includes the following items:

- Analog Telephone Adapter
- Network Cable
- Power Adapter

Before you begin, you will also need:

- A High-Speed Internet connection (cable/DSL/wireless/other)
- A Regular analog touch-tone telephone or FAX machine
- A High-Speed Broadband router or gateway, with an available Ethernet port
- A Surge protector (optional, but highly recommended)

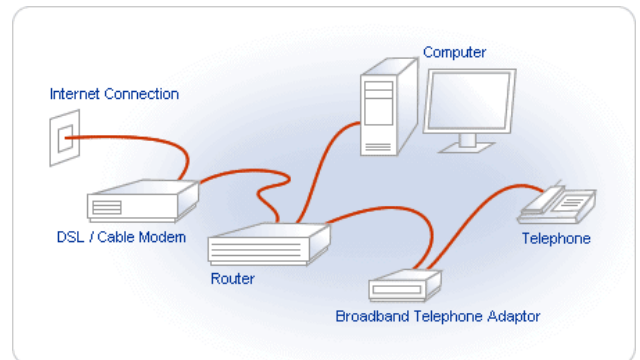

### Step 1: Activate your VOZ account.

If you already have subscribed to VOZ, you can skip to Step 2. Otherwise, visit [www.vozpr.com](http://www.vozpr.com) or call 1-787-723-1100 to subscribe.

### Step 2: Connect your Linksys PAP2T Analog Telephone Adapter

To the right is a diagram of how you want to connect your Telephone Adapter to the Internet. Please follow the steps below in order to correctly activate your service.

1. Turn off or unplug your router and your Cable/DSL/wireless modem
2. Plug one end of the Ethernet cable provided with this kit into the Telephone Adapter's **Ethernet** port.
3. Plug the other end of the Ethernet cable into an available port on your router.
4. Plug your telephone into the Telephone Adapter's **Phone1** port.
5. Plug the surge protector into the nearest electrical outlet.
6. Plug the power supply provided with this kit into the surge protector, and plug the other end of the power supply into the Telephone Adapter's **Power** port.
7. Turn on or plug in your router and Cable/DSL/wireless modem.
8. Pick up the telephone. If you have a dial tone, CONGRATULATIONS! You have successfully setup your VOZ service. If not, please call VOZ Customer Service at 787-723-1100 or email [support@vozpr.com](mailto:support@vozpr.com)
